Mine Design 484

HW 8

Report Subjects 20-21 include Capital Cost, Depreciation, Depletion, Cash Flow and Economic Analysis.

Capital costs are generally reported in spreadsheets by year acquired or replaced. This facilitates the orderly calculation of tax depreciation as an input to cash flow and economic analysis. Operating cost from HW 7 is also summarized here. Revenue is calculated from production per period and market realization. Tabular data is summarized and all significant results are explained in the written sections.

Refer to the 484 Syllabus for more details about each subject area.

These papers will be graded on content, completeness and consistency as well as grammar and spelling. Team members must identify which separate parts of the assignment each has written for grading. Report style and organization, will be counted when the assembled draft report is submitted.
