10th INTERNATIONAL CONFERENCE ON GROUND CONTROL IN MINING

TABLE OF CONTENTS

Practical Aspects of Longwall Pillar Design, C. Mark, U. S. Bureau of Mines, Pittsburgh Research Center .................................................. (1)

3. Load and Convergence Measurements in Longwall Faces and Design Guidelines for Face-Support Systems, R. Ouel, C. Bauer, and E. Ural, Middle East Technical University, Turkey ........................................... (26)

5. Stability of Interpanel-Pillar and Deformation of Gateroad Due to Longwall Mining, K. Matsui, M. Itohise, and K. Uchino, Kyushu University, Japan ......................................................... (43)

6. Use of Polymer Grids for Longwall Shield Recovery, B. E. Travis and R. P. Anderson, Tensar Earth Technologies, Inc. ................................. (52)

7. Methods of Controlling Thick and Strong Roof in Longwall Mining, D. R. Zhu and M. G. Qian, China University of Mining and Technology, China .......................................... (59)

8. Tensioned Point Anchor Resin System vs. Non-Tensioned Fully Grouted Rebar—Two Case Studies, J. C. Stankus, Jemmar Corporation ........................................... (65)

10. An Alternative to a Manual Torque Check on Roof Bolts, J. A. Cybulski and W. J. Gray, MSHA, Bruceton Safety Center ................................................... (85)

11. Shear Bond Stresses Along Cable Bolts, H. S. Mitri and H. Rajate, McGill University, Canada ................................................ (90)

12. An Underground Trial of Cable Slings for Remedial Support of Longwall Gateroads, W. D. Gallant CANMET (Cape Breton), Canada, P. Choquet, Supportek Int'l., and J. MacLachlan and S. Forgeron, Cape Breton Development Corp., Canada ........................................... (96)

13. Mobile Roof Support for Retreat Mining, R. G. Wilson, J. H. Fletcher & Co. ................................................ (100)

16. Delineation of Abandoned Workings with an In-Seam Seismic Method, I. Goldmacher and J. Slade, BHP Engineering (Americas), Inc. ........................................ (120)

23. Determination of the Rock Strength from Portable Rock Tester, K. P. Unruh and Y. J. Zhang, University of Kentucky .................................................

26. Determination of the Stopline Subsidence Profile of Phalen 2 West Panel from Within a Near Horizontal Borehole Over the Panel Stopline, W. D. Gallant, D. J. Forrester, and D. A. Payne, CANMET (Cape Breton), Canada .................................................................

27. Evaluation of Subsidence Parameters for Inclined Seams in UK Coalfields, X. L. Yao, D. J. Reddish, and B. N. Whittaker, University of Nottingham, United Kingdom .................................................................

32. Geomechanical Substantiation of Extraction of Undermined Ore Deposit, N. V. Karlenya, S. N. Popov, and I. L. Boltenhagen, Institution of Mining, Novosibirsk, USSR .................................................................

33. Relationship Between Floor Rock Stress and Floor Failure, X. S. Tan and S. S. Peng, West Virginia University .................................................................

34. The Influence of Geomechanical Parameters Over Stress Distribution in and Around Depillarising Faces, R. Singh, D. Prasad, M. A. Rafiqui, and T. N. Singh, Central Mining Research Station, Dhanbad, INDIA .................................................................

35. Finite Element Modeling of Subsidence Induced by Underground Coal Mining: The Influence of Material Nonlinearity and Shearing Along Existing Planes of Weakness, D. W. H. Su, Consolidation Coal Co .................................................................

Author's Index .................................................................
