12th CONFERENCE ON GROUND CONTROL IN MINING

TABLE OF CONTENTS

History and Purpose of the Ground Control Conference in Mining, S. S. Peng, West Virginia University, Morgantown, WV ................................................................. i

BOLTING

1. Bolting Practice in Longwall Gateroads at the Miike Colliery, K. Matsui, Kyushu University and H. Furukawa, Miike Colliery, Japan .......................................................... 1

4. FLEXIBOLT Flexible Roof Bolts: A New Concept for Strata Control, P. G. Fuller and P. O’Grady, Barrett, Fuller & Partners, Melbourne, Australia ........................................... 24

CRIBS

5. The Design and Application of Hercules Cribbs for Underground Mining, M. Faure, HL & H Mining Timber, Johannesburg, South Africa ............................................................ 35

6. Cyprus Shoshone Tailgate Roof Control: Case Study, A. P. Schissler, Cyprus Coal Company, Englewood, CO ................................................................. 44

ENTRY SUPPORT DESIGN

10. Entry Design for Optimum Stability in a Multi-Seam Environment, M. Akram, R. Fraher, C. Haycocks, and M. Karmis, Virginia Polytechnic Institute and State University, Blacksburg, VA ................................................................. 69

11. Gate Entry Design for Longwalls Using the Coal Mine Roof Rating, C. Mark, and F. E. Chase, Bureau of Mines, Pittsburgh, PA ................................................................. 76

12th CONFERENCE ON GROUND CONTROL IN MINING

15. Further Improvements in the Roof Beam Tilt Method of Gateroad Support Design, P. Cain, Jacques, Whitford and Associates Limited, D. Payne and D. Forrester, CANMET-MRL, Cape Breton Coal Research Laboratory, Canada .......................................................... 114

17. Flexible Support Design for Gateroads of Retreating Longwall Panels, E. Unal and I. Okkan, Middle East Technical University, Turkey .......................................................... 133

LONGWALL MONITORING AND ANALYSIS

18. Longwall Support Monitoring, R. G. Harris, Longwall International, UK .......................................................... 143

LONGWALL OVERBURDEN MOVEMENT

21. Image Analysis Development and Application to Fracture Pattern Analysis, A. Benbia and D. J. Reddish, The University of Nottingham, UK .......................................................... 168

22. Mathematical Modeling of Strong Roof Beds in Longwall Mining, X. Wu and M. G. Korfakis, Virginia Polytechnic Institute and State University, Blacksburg, VA .......................................................... 175

LONGWALL RECOVERY

26. Ground Control and Safety Considerations During Longwall Recovery, W. J. Gray and M. A. Evans, Pittsburgh Safety and Health Technology Center, MSHA, Pittsburgh, PA .......................................................... 217

MINE DESIGN

29. Underground Application of Optimization, S. J. Jung and M. L. Smith, University of Idaho, Moscow, ID .......................................................... 244

12th CONFERENCE ON GROUND CONTROL IN MINING
PILLAR

31. A New Method for Longwall Pillar Design, P. Tsang and S. S. Peng, West Virginia University, Morgantown, WV .................................................. 261

32. A Rock Mass Strength Concept for Coal Seams, G. S. Kalamaras and Z. T. Bieniawski, Pennsylvania State University, PA ......................................... 274

33. Techniques to Increase Yield Pillar Residual Strength, D. R. Dolinar, Bureau of Mines, Denver, CO .......................................................... 284

ROCK/COAL SEAM PROPERTY

35. Structure, Strength and Relaxation of Intercalate for Input into Highwall Mining Design in the Baralaba Coal Measures of Queensland, Australia, E. E. Leisemann and I. L. Follington, CSIRO - Div. of Exploration & Mining, Australia ........................................ 301

36. Rock Compression Caused by Dewatering in Poorly-Consolidated Sandstones, A. N. Nikraz and A. W. Evans, Curtin University of Technology, Western Australia, Australia ................................................ 307

37. Correlation Between the Effect of Contacting Pressure on Compressive Strength in Triaxial Tests and the Effect of Diameter/Height Ratio on Compressive Strength in Unconfined Compression Tests, V. S. Vakkaru and S. M. Farough Hosaini, University of New South Wales, Australia .......................................................... 316

39. Rock Mechanics Property Data Bank for Coal Measure Strat, C. G. Sun and S. S. Peng, West Virginia University, Morgantown, WV ........................................ 330

SOFT FLOOR

40. Failure Modes of Mine Tunnels in Stratified Rock Structures With Reference to Stress Field Conditions, H. Chen, Nottingham Trent University, and S. F. Smith, University of Nottingham, UK ......................................................................................... 342

41. Determination of Plate Size Effect on Ultimate Bearing Capacity of Weak Floor in Underground Coal Mines Using a Boundary Integral Approach, Z. Yu, Y. P. Chugh, and G. Yang, Southern Illinois University at Carbondale, IL .................................................. 350

SURFACE OPERATIONS

43. Investigation of Blast Damage and Underground Stability, S. P. Singh and R. D. Lamond, Laurentian University, Canada ................................................ 366

44. Development of a Slope Stability Program for Improved Quarry Design, J. Bullock, C. Haycocks, and M. Kornik, Virginia Polytechnic Institute and State University, Blacksburg, VA ...................................................... 373

12th CONFERENCE ON GROUND CONTROL IN MINING
SURFACE SUBSIDENCE

47. Surface Fracture Development From Mine Subsidence in Eastern Kentucky, *C. DeRossett and K. F. Uhrig*, University of Kentucky, Lexington, KY ........................................... 397

48. An Integrated Approach to Subsidence Modelling and Prediction in the Collie Basin (Western Australia), *I. Misich*, Western Collieries Ltd., *A. W. Evans and O. Jones*, Curtin University of Technology, Australia ................................................................. 404

49. Effect of High-Extraction Coal Mining on Surface and Ground Waters, *F. S. Kendorski*, Morgan Mining & Environmental Consultants, Ltd., Downers Grove, IL ......................... 412

Author’s Index ............................................................................................................. 433
