# Table of Contents

## Innovative Longwall Tailgate Support

1. Truss Systems for Longwall Gate Entry Support - Update, J. Stankus and S. Guo, Jenamar Corporation, Pittsburgh, PA and S. Peng, West Virginia University, Morgantown, WV ........................................ 1

## Effects of High Horizontal Stresses

5. Roof Support Performance in High Stress Conditions, T. Mucha, C. Mark, J. Zelanko, and C. Compton, USBM-Pittsburgh Research Center, Pittsburgh, PA .................................................. 30

6. Regional Horizontal Stress and Its Effect on Longwall Mining in the Northern Appalachian Coal Field, D. Su and G. Hasefus, CONSOL Inc., Library, PA ........................................... 39

## Pillar Recovery

8. Monitoring Mobile Roof Supports, K. Hay, S. Signer, and M. King, USBM-Spokane Research Center, Spokane, WA ................................................................. 55

9. Analysis of Retreat Mining Pillar Stability, C. Mark, F. Chase, and A. Campoli, USBM-Pittsburgh Research Center, Pittsburgh, PA .................................................. 63

## Pillar Design

11. Influence of Partings in a Coal Seam on Long Term Pillar Stability, K. Biswas, S. Peng, and P. Tsang, West Virginia University, Morgantown, WV ........................................ 80

13. Comparative Case Study of Yielding and Critical Coal Pillar Designs in Bump-Prone Strata, J. Kaehler and M. DeMarco, USBM-Denver Research Center, Denver, CO ........................................ 104
14th CONFERENCE ON GROUND CONTROL IN MINING

PROP SUPPORT

ROOF AND RIB BOLTING

19. Improved Intersection Design and Monitoring in the Sydney Coalfield, G. Corbett and D. Payne, Cape Breton Coal Research Lab., CANMET/MRL, Sydney, Canada .......................... 159

20. Drivage System in Retreat Longwall Gateroad. K. Matsui and H. Shimada, Kyushu University, Japan .......................... 168

21. Case Study of Stability Investigations Related to Shallow Underground Mining of Iron Ore in the United Kingdom. S. Smith and A. Benbla, University of Nottingham, UK .......................... 173

23. Continuous Improvement in Cuttable Coal Rib Support in Australian Coal Mines. G. Skybey, Dupont (Australia) Ltd., Sydney, Australia .......................... 189

FLOOR STABILITY

SURFACE SUBSIDENCE

27. Integration of CAD-Based Mine Planning and Subsidence Engineering Systems. A. Jarosz, University of the Witwatersrand, South Africa .......................... 218
14th CONFERENCE ON GROUND CONTROL IN MINING

28. Development of a Subsidence Database and Determination of Subsidence Parameters, S. Peng, Y. Luo, and Z. Zhang, West Virginia University, Morgantown, WV .............................................................. 226

29. Statistical Regional Calibration of Subsidence Prediction Models, D. Cleaver and D. Reddish, University of Nottingham, C. Shadbolt, British Coal Corp., and R.K. Dunham, University of Nottingham, UK .............................................................. 236

30. Subsidence Monitoring Results, Thick Seam Longwall Mining in Wyoming, C. Stewart, Cyprus Shoshone Coal Company, Hanna, WY .............................................................. 244

LONGWALL OPERATIONS

33. Vertical Stress Redistribution Around a Retreating Longwall Face End, D. Payne, CANMET-MRL Cape Breton Coal Research Laboratory, Sydney, Canada and M. DeMarco, USBM-Denver Research Center, Denver, CO .............................................................. 273

LONGWALL ENTRY STABILITY

34. Entry Stability Monitoring and Analysis for Longwall & Continuous Mining Systems, W.M. Hart and J. Chen, Cyprus Amex Coal Company, Englewood, CO and S.S. Peng, West Virginia University, Morgantown, WV .............................................................. 284

MULTIPLE SEAM MINE DESIGN

36. Multiseam Mining on South African Collieries, R. Hill, CSIR-Mining Technology, South Africa .............................................................. 305

37. Design and Planning of Lower Seam Longwall Gate Roads, R. Ganguli, C. Haycocks, and M. Karmis, Virginia Polytechnic and State University, Blacksburg, VA .............................................................. 312

38. Optimizing Pillar Design in a Multi-Seam Environment, R. Kanniganti, C. Haycocks, and M. Karmis, Virginia Polytechnic and State University, Blacksburg, VA .............................................................. 320

Author's Index .............................................................. 325
