# TABLE OF CONTENTS

## Longwall Mining and Surface Subsidence

1. Longwall Mining—Through the Back-filled In-panel Entries at Cyprus Emerald Mine, J. Chen and M. Mislera, Pennsylvania Services Corp., S. Cario, Cyprus Emerald Resources Corp., and J. DeMichiel, Cyprus Amco Coal Co., Waynesburg, PA ................................. 1

5. Longwall Surface Subsidence Prediction Through Numerical Modelling, N. Mohamad, P.W. Lloyd, and D.J. Reddish, University of Nottingham, UK ........................................... 33

7. Subsidence Prediction Influence Assessment and Damage Control, Y. Luo and S.S. Peng, West Virginia University, Morgantown, WV .................................................. 50

9. Significant Weighting Events on the Longwalls in the Phalen Colliery, R.J. MacDonald, The Cape Breton Development Corp., Canada .................................................. 68

10. Full-face Pressure Monitoring in Medium-Weak Roof Condition, S.S. Peng and H. Cheng, West Virginia University, Morgantown, WV ............................................ 79

11. Research on the Interaction Between Roof Strata and Shield Supports, Y. Shi and Q. Gu, Central Coal Mining Research Institute and C. Zhang and J. Li, Lian Coal Bureau, China ................... 85

12. Roof Instability of Longwall Face at Ikeshima Colliery, K. Matsui and H. Shinada, Kyushu University, Japan ................................................................. 91

13. Gob Canopy Roof Support for Difficult Natural Conditions, J.H. Kelley, West Virginia University, Morgantown, WV ..................................................... 98

Roof Bolting

17. Extending the Limits of Strata Bolting by the Use of Flexible Strand Rockbolts, D.R. Barrett, Exchem Mining & Construction, UK

19. New Methods and Technologies of Roofbolting in Australia Coal Mines, M. Rataj, Ani Arnall and R. Thomas, Strata Engineering Australia, Australia

22. A Study of the Performance of Glass Fibre Rock Reinforcement Components, J.P. Furniss and D.J. Reddish, University of Nottingham, and G. Adkins, MAID Systems UK Ltd., UK

24. Strategies for the Application of Rockbolting Technology to Longwall Gateroads in Chinese Coal Mines, Z. Xiu and X. Wang, Beijing Research Institute of Coal Mining, and A. Wang, Dalian Coal Mine, China

Retreat Mining

26. A Statistical Overview of Retreat Mining of Coal Pillars in the United States, C. Mark, F.E. McCall, and D.M. Pappas, NIOSH-PRC, Pittsburgh, PA

27. Full-Scale Performance Evaluation of Mobile Roof Supports, T.M. Barzak, NIOSH-PRC and D.F. Gearhart, SSI Services, Inc., Pittsburgh, PA

Rock Salt

28. Effect of the Interchamber Pillar Yield on the Surface Strains in the Movement Trough Edges, M.P. Nesterov and N.F. Anikin, Institute of Haulage, Russia

29. Salt Pillar Design Equation, L.L. Van Sambeek, RE/SPEC Inc., Rapid City, SD

30. Case Study of Conditions Observed During the Removal of a Highly Fractured Roof Beam in Carlsbad, NM

Carlsbad, NM

32. Ground Control and the Inundation of the Retsof Mine, V.A. Savarese, John T. Boyd Co., Pittsburgh, PA ................................................................. 251

Coal Pillar and Rock Properties

33. Weatherability Test of Rocks for Underground Mines, K.F. Unrug, University of Kentucky, Lexington, KY. 259

34. Shear Strength Characteristics of Soft Rock Joints Based on Constant Normal Stiffness Testing, B. Indraratna, N. Aziz, and A. Haque, University of Wollongong, Australia ................................. 267

Roof and Ground Control

37. Ground Control Worker Safety During Extended Cut Mining, R.H. Grau, III and E.R. Bauer, NIOSH-PRC, Pittsburgh, PA .............................................................. 283

38. Analysis of Extensometer Data from a Room Widening Experiment Designed to Induce a Roof Fall, D.R. Dolinar, D.C. Oyster, and C.S. Compton, NIOSH-PRC, Pittsburgh, PA ............................................ 289

39. Airbag Support for Ground Control in Thin Seam Coal Mining, S. Fan and L. Kang, Central Coal Mining Research Institute and K. Yu, Shangjing Coal Bureau and Z. Zhang, Lian Coal Bureau, China .................. 296

41. Ground Control Criteria for Coal Reserve Optimization in Multiple-Seam Mines, E. Westman, J. Luo, C. Haycock, and M. Karmis, Virginia Polytechnic Institute and State University, Blacksburg, VA ............................. 311

42. Calcium Aluminate Binders in Hard Rock and Coal Mining, B. Woolley, Lafarge Calcium Aluminates, Chesapeake, VA ................................................................. 316

43. Simplified Pre- and Post-Processing Technique for Performing Finite-Element Analyses of Deep Underground Mines, M.T. Filigenti, NIOSH-SRC, Spokane, WA ............................................ 320

Author’s Index ........................................................................................................... 329
