SESSION I: COAL PILLAR AND OUTBURST

1. STRESS AND STABILITY IN COAL RIBSIDES AND PILLARS, A. H. Wilson ........................... (1)
2. IMPROVED DESIGN OF COAL PILLARS FOR U.S. MINING CONDITIONS, Z. T. Bieniaszewski ........ (13)
3. REVIEW OF PILLAR DESIGN EQUATIONS INCLUDING THE EFFECTS OF CONSTRAINT, C. Babcock,
   T. Morgan, and K. Harary ......................................................... (23)
4. ABUTMENT PILLAR "WHITING" IMPROVES ABUTMENT TUNNEL ROOF CONDITIONS AT THE GAYLIGA ROCK
   SALT MINE, D. B. Plumau and G. B. Petersen .......................................... (35)
5. THE INFLUENCE OF CERTAIN GEOLOGIC AND GEOENGINEERING FACTORS ON COAL MINES FLOOR STABILITY
   A CASE STUDY, R. G. Speck ............................................................ (44)
6. CONSIDERATION OF GAS OUTBURSTS IN USING DOME SALT MINES FOR STORAGE OF OIL AND NUCLEAR
   WASTE, M. A. Mehta ................................................................. (50)

SESSION II: ROOF AND GROUND CONTROL TECHNOLOGY

1. AN OVERVIEW OF BUREAU OF MINES GROUND CONTROL RESEARCH, J. M. Kurtzak ........................... (59)
2. STABILITY BEHAVIOR OF COAL MINING TUNNELS WITH DIFFERENT SUPPORTS, H. T. Wells and
   R. N. Whittaker ....................................................................................... (77)
3. SIMPLE ROCK MECHANIC TOOL FOR EFFECTIVE ROOF CONTROL, R. Pathini and H. von Schnelldorf . Supplement
4. STRATA DISTURBANCE PREDICTION FOR MINING BELOW SURFACE WATER AND WASTE IMPLEMENTS,
   M. M. Singh and F. S. Rendorski ........................................................... (76)
5. MONITORING FOR THE EVALUATION OF THE STABILITY OF UNDERGROUND OPENINGS, P. K. Kaiser .... (90)

SESSION III: ROOF CONTROL TECHNOLOGY

1. CONTROLLED THRUST AND TORQUE PLACEMENT OF MECHANICAL ANCHOR BOLTS AND THEIR RELATIONSHIP
   TO IMPROVED ROOF CONTROL, A. Mahera, C. J. H. Brest Van Kempen, J. F. Conway, and
   A. H. Jones ............................................................................................. (98)
2. ROKLOK POLYURETHANE BINDER: A CHEMICAL INJECTION SYSTEM FOR THE CONSOLIDATION OF SEVERE
   IN-GROUND CONDITIONS, K. W. McCabe ................................................ (106)
3. RESUPPORTING HIGH ROOF FALLS, N. Chlumecky ....................................................... (116)
4. A NEW COMBINATION FRACTURE-SUSPENSION SUPPORT SYSTEM—SCOTT CABLE SLINGS, J. J. Scott and
   B. R. Castle .............................................................................................. (132)
5. INORGANIC CEMENT GROUTED BOLT SYSTEM, M. O. Serbousek and D. D. Bolstad .................. (137)
6. DEVELOPMENT OF A RESIN POINT ANCHOR, R. R. Wilding and M. L. Thomson .................... (141)

*Included in a supplemental volume.
SESSION IV: CASE HISTORY AND PREMINING

1. AN ENGINEERING ANALYSIS OF "SQUEEZE" FAILURE OF PILLARS IN THE PITTSBURGH COAL BED, G. Mishra and R. L. Grayson ........................................ (144)

2. GROUND CONTROL IN MULTIPLE SEAM MINING, R. A. Stanbury ........................................ (154)

3. GROUND CONTROL PROBLEMS AT MORTON MINE, J. B. Bann ........................................ Supplement*

4. APPLICATIONS OF REFLECTION SEISMSICS TO MAPPING COAL SEAM STRUCTURE AND DISCONTINUITIES, T. L. Dobiecki and L. C. Bartel ........................................ (160)

5. THE USE OF GEOLOGIC MODELLING IN THE PREDICTION OF ADVERSE ROOF CONDITIONS, E. S. Custer, Jr. and F. L. Gaddy ........................................ (167)

SESSION V: LONGWALL

1. DESIGN OF SHIELD SUPPORTS FOR THE U.S. COAL MINING INDUSTRY, A. Peacock ........................................ (174)

2. LONGWALL MINING IN THIN SEAMS, E. A. Curth ........................................ (239)

3. LONGWALL EXPERIENCE IN THE PITTSBURGH SEAM, R. Dangerfield ........................................ Supplement*

4. SUPPORT SELECTION FOR THE MULTILIFT MINING METHOD, C. A. Goode, J. S. Jaspaht, and T. M. Barczak ........................................ (186)

5. DESIGN AND OPERATION OF POWERED AND ENTRY SUPPORTS, T. L. Hutchinson ........................................ (201)

SESSION VI: SUBSIDENCE

1. EVALUATION OF EXISTING PREDICTIVE METHODS FOR MINE SUBSIDENCE IN THE UNITED STATES, V. Adamek and P. Jeran ........................................ (209)

2. A STUDY OF LONGWALL SUBSIDENCE IN THE APPALACHIAN COAL REGION USING FIELD MEASUREMENTS AND COMPUTER MODELING TECHNIQUES, M. Rennis, C. Haycock, L. Eitani and B. Webb ........................................ (220)

3. SUBSIDENCE STUDIES IN THICK AND STEEP COAL SEAM MINING, M. Y. Piszeki, A. Chorzanski, B. M. Das, and G. H. LaRocque ........................................ (230)

*Included in a supplemental volume.
