# Table of Contents

## Keynote Address

Presented at the 23rd International Conference on Ground Control in Mining, August 3-5, 2004, L. Wade, NIOSH – Washington, DC.

---

## Longwall Mining

1. Analysis and Design of Rib Support (ADRS) a Rib Support Design Methodology for Australian Collieries, M. Colwell, Colwell Geotechnical Services, Caloundra, Australia and C. Mark, NIOSH – Pittsburgh Research Laboratory, Pittsburgh, PA.

2. Evaluation of the Impact of Standing Support on Ground Behavior in Longwall Tailgates, T. Barczak, G. Esterhuizen, and D. Dolinar, NIOSH - Pittsburgh Research Laboratory, Pittsburgh, PA.

3. Half a Career Trying to Understand Why the Roof Along the Longwall Face Falls in from Time to Time? R. Frith, University of New South Wales, Sydney, Australia.

7. Outcomes of the Landmark Longwall Automation Project With Reference to Ground Control Issues, M. Kelly and D. Hainsworth, CSIRO Exploration & Mining, Kenmore, Queensland, Australia.

### Multiple Seam Mining

9. **Multiple Seam Mining Interactions: Case Histories from the Harris No. 1 Mine**, F. Chase, NIOSH - Pittsburgh Research Laboratory, Pittsburgh, PA; P. Worley, Peabody Energy, Wharton, WV, and C. Mark, NIOSH - Pittsburgh Research Laboratory, Pittsburgh, PA.  

10. **Analysis of Entry Stability Associated with Multi-seam Mining – A Case Study**, J. Han, Y. Luo, and S.S. Peng, West Virginia University, Morgantown, WV.  

11. **Failure Mechanics of Multiple Seam Mining Interactions**, R.K. Zipf, Jr., NIOSH - Pittsburgh Research Laboratory, Pittsburgh, PA.  

13. **Definition of Ultra-close Multiple-seams and its Ground Pressure Behavior**, B. Zhang, L. Kang, and Y. Zhai, Taiyuan University of Technology, Taiyuan, China.  

### Pillar/Pillar Extraction

14. **Depillaring and Roof Bolting Practices at Quinsam Coal Mine**, K. Galovich, Quinsam Coal Corporation, P. Krivokuca, Quinsam Coal Underground Operations, Campbell River, Canada, and A. Craven, Jennmar Corporation, Clearfield, UT.  

15. **Seam Structure – An Important Criterion for Coal Pillar Design**, K. Unrug and D. Turner, University of Kentucky, Lexington, KY.  

### Surface Subsidence

17. **Impacts of Longwall Mining Subsidence on Hydrology, Soil Moisture, and Tree Health in Belmont County, Ohio**, D.L. Bartsch, Ohio Valley Coal Company, Alledonia, OH; R.R. Hicks, West Virginia University, Morgantown, WV; J.R. Runkle, Wright State University, Dayton, OH, and P. M. Craig and C.M. Wallen, Dynamic Solutions, Knoxville, TN.  

18. **Basics on the Dimensioning and the Extraction of Shaft Safety Zones**, A. Sroka, Freiberg University of Mining & Technology, Freiberg, Germany and A. Preusse and H. Kateloe, RWTH Aachen University, Aachen, Germany.
24th International Conference on Ground Control in Mining

Roof Falls

20. **Recent Advances in Numerical Simulation of Cutter Roof Failure in Underground Coal Mines**, M.M. Gadde and S.S. Peng, West Virginia University, Morgantown, WV

Geology

22. **Geotechnical Strata Characterisation Using Geophysical Borehole Logs**, T. Medhurst, AMC Consultants Pty. Ltd., Brisbane, Australia and P. Hatherly, University of Sydney, Sydney, Australia

High Horizontal Stresses

25. **Ground Control of a Mine Stope in Weak Rocks Subjected to High In-situ Stresses – A Case Study**, C.C. Li, Norwegian University of Science and Technology, Trondheim, Norway

Highwall Mining/Slope Stability

24th International Conference on Ground Control in Mining

28. The Slope Stability Assessment in the Wall Overlooking the Sungun Copper Concentrator Plant, S. Mehrdad Heidari, Qazvin International University, Tehran, Iran and A.R. Taherian, Lar Consulting Engineers, Tehran, Iran.................................................................225

Mine/Roof Support Design

29. Numerical Modeling as a Tool to Predict Pillar Condition and Assist in Mining Sequencing, P. Palmer and D. Morrison, Golder Associates Ltd., Ontario, Canada..........................................................232
32. Using Foaming Grout to Stabilize a Ventilation Raise in Very Poor Rock, J.J. Magyar, International Mining Services, Belvidere, IL and A. Campoli, Minova USA, Inc., Georgetown, KY.................................250
33. Roof Control and Roadway Support Design in the #9 Coal Seam, Wuhushan Coal Mine, China, Y. Ma, X. Gui, and L. Zhang, Liaoning Technical University, Liaoning, China........................................255
34. Non-confirmation Mathematics for Wall Rock Classification for Mine Support, G. Sun, Heilongjiang Institute of Science and Technology, Heilongjiang, China, Y. Ma, Liaoning Technology University, Liaoning, China, and H. Wu, Heilongjiang Institute of Science and Technology, Heilongjiang, China.................................................................262
35. The Influence of the First Layer Thickness of Immediate Roof on its Stability, L. Kang and S. Yang, Taiyuan University of Technology, Taiyuan, China.................................................................264
36. Studies on Distribution Pattern of and Methane Migration Mechanism in the Mining-Induced Fracture Zones in Overburden Strata, S. Li, H. Lin, L. Cheng, and X. Wang, Xi’an University of Science and Technology, Xi’an, China.................................................................268

Roof Bolting

41. Investigation of Fully Grouted Roof Bolts Installed Under In-situ Conditions, C. Compton and D. Oyler, NIOSH - Pittsburgh Research Laboratory, Pittsburgh, PA .........................................................302

42. Development of the Laboratory Short Encapsulation Pull Test for a Revised British Standard on Rock Reinforcement Components Used in Coal Mining, D. Bigby and C. Reynolds, Rock Mechanics Technology Ltd., Burton-on-Trent, United Kingdom .........................................................313

46. Shear Bond Characteristics in Grouted Cable Bolts, J.Y. Chen, Golder Associates, Montreal, Canada and H. Mitri, McGill University, Montreal, Canada .........................................................342

47. Overcoring Techniques to Assess In-situ Corrosion of Galvanised Friction Bolts, R. Hassell and E. Villaescusa, Western Australian School of Mines, Kalgoorlie, Australia .........................................................349

49. Mechanical Response of Split-set Rock Bolts in Squeezing Ground, T. Williams, NIOSH – Spokane Research Laboratory, Spokane, WA, D. Bayer, Hecla Mining Company, Mullen, ID, T. Brady, NIOSH – Spokane Research Laboratory, Spokane, WA, R. Pakalnis, University of British Columbia, Vancouver, Canada, and F. Varley, NIOSH – Spokane Research Laboratory, Spokane, WA .........................................................366

50. Mechanisms of Rib Sloughing and Methods of Controlling Thick Bolted Ribs, S. Yang, Taiyuan University of Technology, Taiyuan, China .........................................................372
Supporting Method of the Bolted Strata in Large Deformation Roadways, S. Yang, L. Kang and B. Zhang, Taiyuan University of Technology, Taiyuan, China

Detection of Abandoned Mines and Air Passages/Burning Centers of Mine Fires by Combined Electromagnetic Method, S. Yan and M. Shen, China Coal Research Institute, Xi’an, China

Detecting Abandoned Coal Mine Entries by High Resolution Earth Resistivity Method, X. Shi, S. Yan, and M. Shen, China Coal Research Institute, Xi’an, China
