THIRD CONFERENCE ON GROUND CONTROL IN MINING

Special thanks are due to S.S. Peng of the West Virginia University, Morgantown, West Virginia, for his efforts in combining the Third Conference on Ground Control in Mining with this Symposium.

SPONSORS

The Organizing Committee of the 25th US Symposium on Rock Mechanics gratefully acknowledges financial contributions from the following:

Harza Engineers, Inc.
Chicago, Illinois

Terrametrics
Golden, Colorado

Claude Hurley Co.
Oakbrook Terrace, Illinois

Engineers International, Inc.
Westmont, Illinois

Soil Test, Inc.
Evanston, Illinois

RE/SPEC
Calgary, Alberta, Canada

Woodward Clyde Consultants
Chicago, Illinois

SESSION CHAIRMEN

The help of the Session Chairmen in organizing this symposium is greatly appreciated.

J.F. Abel
Colorado School of Mines
Golden, Colorado

W.R. Judd
Purdue University
Lafayette, Indiana

B. Amadei
University of Colorado
Boulder, Colorado

M.J. Karmis
Virginia Polytechnic Institute & State University
Blacksburg, Virginia

G.B. Baecher
Massachusetts Institute of Technology
Cambridge, Massachusetts

F.S. Kendorski
Terrafirma Engineers, Inc.
Naperville, Illinois

D.C. Banks
Waterways Experiment Station
Vicksburg, Mississippi

G.A. Kiersch
Cornell University
Ithaca, New York

Z. Bazant
Northwestern University
Evanston, Illinois

K. Kim
Rockwell Hanford Operations
Richland, Washington

Z.T. Bieniawski
Penn State University
University Park, Pennsylvania

F.H. Kuhlawy
Cornell University
Ithaca, New York

E.J. Cording
University of Illinois
Urbana, Illinois

F.T. Lee
US Geological Survey
Denver, Colorado

A.G. Franklin
Waterways Experiment Station
Vicksburg, Mississippi

D. Linger
Defense Nuclear Agency
Washington, DC

A.J. Hendron
University of Illinois
Urbana, Illinois

C.W. Lovell
Purdue University
Lafayette, Indiana

F.E. Hine
Lawrence Livermore National Laboratory
Livermore, California

R.G. Lundquist
Ohio State University
Columbus, Ohio

E.P. Hoskins
Texas M&M University College Station, Texas

A.M. Mahtab
Columbia University
New York, New York

J. Monaco
Metrorail Transit Consultants
Los Angeles, California

P. Nelson
University of Texas
Austin, Texas

W.G. Parisca
University of Utah
Salt Lake City, Utah

H.W. Parker
Shannon Wilson, Inc
Seattle, Washington

S.S. Peng
West Virginia University
Morgantown, West Virginia

H.J. Pincus
University of Wisconsin
Milwaukee, Wisconsin

J.C. Roegiers
Dowell Inc.
Tulsa, Oklahoma

S.P. Shah
Northwestern University
Evanston, Illinois

J.C. Sharer
Gas Research Institute
Chicago, Illinois

H. Spetzler
University of Colorado
Boulder, Colorado

C. St. John
Agabian Associates
El Segundo, California

D.A. Summers
University of Missouri
Rolla, Missouri

W.R. Wawersik
Sandia National Laboratory
Albuquerque, New Mexico
US NATIONAL COMMITTEE FOR ROCK MECHANICS

OFFICERS

CHAIRMAN
James H. Coulson
Tennessee Valley Authority
Knoxville, Tennessee

IMMEDIATE PAST CHAIRMAN
AND EX-OFFICIO MEMBER
Kate H. Hadley
Exxon Company USA
Houston, Texas

VICE-CHAIRMAN
Howard J. Pincus
Departments of Geological Sciences
and Civil Engineering
University of Wisconsin
Milwaukee, Wisconsin

AT-LARGE MEMBERS

Z.T. Bieniawski
Pennsylvania State University
University Park, Pennsylvania

Douglas D. Bolstad
US Bureau of Mines
Spokane, Washington

Francois E. Heuze
Lawrence Livermore Laboratory
University of California
Livermore, California

James E. Monses
Metrorail Transit Consultants
Los Angeles, California

Terry E. Tullis
Department of Geological Sciences
Brown University
Providence, Rhode Island

David J. Varnes
US Geological Survey
Denver, Colorado

Himar von Schonfeld:
Occidental Research Corporation
Irvine, California

SECRETARIAT STAFF

ACTING EXECUTIVE SECRETARY
Susan V. Heister
National Research Council
Washington, D.C.

ADMINISTRATIVE ASSISTANT
Barbara S. Adams
National Research Council
Washington, D.C.

US National Committee for Rock Mechanics Continued

SOCIETY REPRESENTATIVES

AMERICAN GEOPHYSICAL UNION (AGU)
Earl R. Hoskins
Department of Geophysics
Texas A&M University
College Station, Texas

AMERICAN SOCIETY OF CIVIL ENGINEERS (ASCE)
Fred H. Kulhawy
School of Civil and Environmental Engineering
Cornell University
Ithaca, New York

AMERICAN SOCIETY OF MECHANICAL ENGINEERS (ASME)
Sunder R. Advani
Department of Engineering Mechanics
Ohio State University
Columbus, Ohio

AMERICAN SOCIETY FOR TESTING AND MATERIALS
Howard J. Pincus
Departments of Geological Sciences and Civil Engineering
University of Wisconsin
Milwaukee, Wisconsin

ASSOCIATION OF ENGINEERING GEOLOGISTS (AEG)
Arthur B. Arnold
Bechtel, Inc.
San Francisco, California

GEOLOGICAL SOCIETY OF AMERICA (GSA)
George A. Kiersch
Geologic Consultant
Tucso, Arizona

SOCIETY OF EXPLORATION GEOPHYSICISTS (SEG)
Gary R. Olhoeft
Branch of Petrophysics and Remote Sensing
US Geological Survey
Denver, Colorado

SOCIETY OF EXPLOSIVES ENGINEERS (SEE)
Robert G. Lundquist
Associate Professor of Mining Engineering
Ohio State University
Columbus, Ohio

SOCIETY OF MINING ENGINEERS (SME)

Purdue University
Lafayette, Indiana
Published Proceedings of the Previous US Rock Mechanics Symposia

First Symposium on Rock Mechanics, Quarterly, Colorado School of Mines, Vol. 51, No. 3, April 1956. (Out of print)

Second Symposium on Rock Mechanics, Quarterly, Colorado School of Mines, Vol. 52, No. 3, April 1957. (Out of print)

Third Symposium on Rock Mechanics, Quarterly, Colorado School of Mines, Vol. 54, No. 3, July 1959. (Out of print)

Fifth Symposium on Rock Mechanics, University of Minnesota, May 1962. Published by Pergamon Press. (Out of print)

Sixth Symposium on Rock Mechanics, University of Missouri, October 1964. Preprints only.

Failure of Breakage of Rock, Eighth Symposium on Rock Mechanics, University of Minnesota, September 1966. Published by The American Institute of Mining, Metallurgical, and Petroleum Engineers, Inc. (Out of print)

Status of Practical Rock Mechanics, Ninth Symposium on Rock Mechanics, Colorado School of Mines, April 1967. Published by the Society of Mining Engineers of AIME, 1972. (Out of print)

Basic and Applied Rock Mechanics, Tenth Symposium on Rock Mechanics, University of Texas at Austin, May 1968. Published by the Society of Mining Engineers of AIME, 1972. (Out of print)

Dynamic Rock Mechanics, Twelfth Symposium on Rock Mechanics, University of Missouri-Rolla, November 1970. Published by the American Society of Civil Engineers, 1972. (Out of print)

Stability of Rock Slopes, Thirteenth Symposium on Rock Mechanics, University of Illinois at Urbana, August-September 1971. Published by the American Society of Civil Engineers, 1972.

Design Methods in Rock Mechanics, Sixteenth Symposium on Rock Mechanics, University of Minnesota, September 1975. Published by the American Society of Civil Engineers, 1977.

Site Characterization, Seventeenth Symposium on Rock Mechanics, University of Utah, August 1976. Preprint-proceedings published by the Utah Engineering Experiment Station, 1976. (Also, Monograph on Rock Mechanics Applications in Mining, Published by the Society of Mining Engineers of AIME, 1977.)

Nineteenth Symposium on Rock Mechanics, Mackay School of Mines, University of Nevada, May 1978. Published by Conferences & Institutes, Extended Programs and Continuing Education, 1978.

Twentieth Symposium on Rock Mechanics, University of Texas at Austin, June 1979. Published by the Center for Earth Sciences and Engineering, University of Texas at Austin, 1979.

The State of the Art in Rock Mechanics, Twenty-First Symposium on Rock Mechanics, University of Missouri-Rolla, May 1980. Published by the University of Missouri-Rolla, 1980.

Rock Mechanics from Research to Applications, Twenty-Second Symposium on Rock Mechanics, Massachusetts Institute of Technology, Cambridge, Massachusetts, July 1981. Published by the Massachusetts Institute of Technology, 1981.

Note: Those desiring to obtain out-of-print proceedings of earlier symposia are advised to refer to the Engineering Societies Library, 345 E. 47th St., New York, NY 10017, or University Microfilms International, 300 N. Zeeb Rd., Ann Arbor, MI 48106, regarding microfilm or photocopies of such publications.
TABLE OF CONTENTS

Preface • Charles H. Dowding and Madan M. Singh ........................................ iii
Organizing Committee and Sponsors .............................................................. iv
Session Chairmen .............................................................................................. v
US National Committee for Rock Mechanics .................................................. vi
Published Proceedings of the Previous US Rock Mechanics Symposia ........ viii

1. AWARD WINNERS ...................................................................................... 1

2. KEYNOTE ADDRESS .................................................................................. 13

2. Twenty-Five Years of Rock Mechanics—A Personal View.
   C. Fairhurst ............................................................................................. 15

3. FRACTURE MECHANICS—THEORY ....................................................... 19

3. A Criterion for Quasibrittle Crack Growth.
   L.G. Margolin and B.W. Smith ................................................................. 21

   Z.P. Bazant ............................................................................................ 29

5. Mixed Mode Fracture Mechanics with Emphasis on Transversely
   Isotropic Rocks.
   P.L. Lavery, K.P. Chong, and M.D. Kuruppu ............................................ 38

   L.E. Vallejo and E. Pramono .................................................................. 47

   A.M. Strauss ............................................................................................ 55

4. FRACTURE MECHANICS—EXPERIMENTAL ....................................... 65

8. Ultrasonic Probing of the Fracture Process Zone in Rock Using
   Surface Waves.
   P.L. Swanson and D. Spetzler ................................................................... 67

   J.F. Dabuz, S.P. Shah, and C.H. Dowding .............................................. 77

10. Strain Localization During Deformation of Western Granite.
    N.S. Brodsky and H.A. Spetzler ............................................................. 87

11. Laboratory Hydraulic Fracturing Stress Measurements in Salt.
    G.M. Boyce, T.W. Doc, and E. Major ..................................................... 95

12. Study of Fracture Mechanisms in Coal Subjected to Various Types of
    Surface Traction Using Holographic Interferometry.
    A.W. Khair ......................................................................................... 103

5. FRACTURE MODELING AND FIELD VERIFICATION
   FOR GAS EXTRACTION ........................................................................ 115

13. Numerical and Physical Studies of Fluid-Driven Fracture Propagation in
    Jointed Rock.

14. Rock Mechanics Effects Observed Subsequent to Multiple Fracturing of
    Wellbores.
    J.F. Cuderman ................................................................................... 127

15. Propagation of a Crack Through an Interfacial Boundary.
    J.C. Lee and L.M. Keer ..................................................................... 135

16. The Interaction of Geology, Mechanical Properties and In-Situ
    Stresses in Hydraulic Fracturing.
    J.N. Schuyler and J.D. McLennan ....................................................... 145

    S.K. Griffiths, C.W. Smith, and R.H. Nilson ........................................ 157

6. IN-SITU STRESS ..................................................................................... 165

18. Using a Sonic Technique to Estimate In Situ Stresses.
    N. Mao, J. Sweeney, J. Hanson, and M. Costantino .............................. 167

    J.W. Teufel and N.R. Wapinski ......................................................... 176

20. In Situ Stress by Pulse Velocity Monitoring of Induced Fractures.
    J.M. Pitt and L.A. Klosiennik .............................................................. 186
21. Development of a Wireline Hydrofracturing Technique and Its Use at a Site of Induced Seismicity.
   B.C. Haimson and M.Y. Lee ................................. 194

22. Mining-Induced Stress Measurement with Hydraulic Borehole Pressure Cells.
   P.H. Lu .................................................. 204

   H.S. Morgan ............................................. 212

7. ANALYTICAL TECHNIQUES 221

   J.H. Curran and L. Vandamme .............................. 223

   D.E. Van Dillen and C.M. St. John ....................... 231

   J. Kairitsas, M. Gencer, and H.H. Einstein .............. 239

27. Thermoviscoelastic Finite Element Model Simulations Associated with Underground Coal Conversion.

   K.C. Lau, A.M. Crawford, and K.A. Smith ................. 261

29. Discontinuous Deformation Analysis.
   G. Shi and R.E. Goodman ................................ 269

8. BEHAVIOR UNDER SPECIAL CONDITIONS 279

    R.M. Zimmerman, M.P. Board, E.L. Hardin, and M.D. Veoegle 281

    S.C. Blair, W.J. Deutsch, and L.D. Kannberg ........... 296

32. The Effect of Discontinuities, Stress Level, and Discontinuity Roughness on the Thermal Conductivity of a Maine Granite.
    T.C. Sanford, F.R. Decker, and K.H. Maxwell ............ 304

33. The Effect of Pore Pressure and Heating Time on the Strength and Sliding Stability of a Serpentinite Gouge.
    D.E. Moore, M. Jin, R. Summers, and J.D. Byerlee ..... 312

34. Time-Dependent Behaviour of Joints in Shale.
    R.K. Bowden and J.H. Curran ............................ 320

35. Rock Mechanics Aspects of Volume Changes in Calcium Sulfate Bearing Rocks Due to Geochemical Phase Transitions.
    C. Zanbak and R.C. Arthur .............................. 328

    B. Amadei, V. Janoc, M. Robison, and R. Kuberan ....... 338

9. CHARACTERIZATION STUDIES 349

37. Fractures and Physical Properties of the Mount Waldo Granite Pluton, Maine.
    F.T. Lee, S.F. Diehl, and D.R. Miller .................... 351

    M.S. Coates ............................................ 362

    H.S. Swolls and W.Z. Savage ............................. 370

    T. Pfeifer .............................................. 381

41. Fracture Toughness of Sandstones and Shales.
    P.E. Senseny and T.W. Pielke ............................ 390

42. The Relationship of Uniaxial Compressive Strength to Point-Load and Moisture Content Indices of Highly Anisotropic Sediments of the Illinois Basin.
    R.A. Bauer ............................................. 398

10. CHARACTERIZATION STUDIES-IN SITU 407

    P.R. La Pointe and H.C. Ganow .......................... 409

44. Poisson’s Ratio as a Parameter for Determining Dynamic Elastic Modulus.
    D.M. Cregeen and T.J. Lamb .............................. 417

45. Rapid Assessment of Shear Strength and Its Variability.
    J.M. Pitt and J.R. Rohde ............................... 428

46. Performance Testing of the Doorstopper Biaxial Strain Cell.
    R.G. Stickney, P.E. Senseny, and E.C. Gregory .......... 437

    R.C. Ilsley, S.B. Fradkin, and J.M. McBee ............... 445

### 21. BLASTING CASE HISTORIES

- Results from Some Oil Shale Fragmentation Experiments Conducted at the Anvil Points Mine, Colorado.  
  **R.D. Dick.**  
  987

- Rock Engineering for Tyee Lake Dam.  
  **J. Cogan and F.C. Kintzer.**  
  989

- Lake Thistle Emergency Drainage Project.  
  **R.J. Essex, L.L. Oriard, and S.T. Freeman.**  
  1000

- Microcomputer Simulation of Rock Blasting to Predict Fragmentation.  
  **C.D. da Gama.**  
  1010

- Probabilistic Analysis of Blasting Impact on Open Pit Stability.  
  **D.S. Young.**  
  1018

- Prototype Sheathed Explosive Rock-Breaker Charge for Open Cutting in Flammable Atmospheres.  
  **R.J. Mainiero and J.E. Hay.**  
  1042

### 22. WAVE PROPAGATION

- Cross-Hole Acoustic Measurements in Basalt.  
  **M.S. King, I.R. Myer, and J.J. Rezowall.**  
  1053

- A Laboratory Study of Seismic Velocities and Attenuation of Host Rocks for a Nuclear Waste Repository.  
  **B.N.P. Paulsson.**  
  1063

- Flow Path Delineation Using Alterant Geophysical Tomography.  
  **A.L. Ramirez and R.J. Lyte.**  
  1074

  **M. Karmis, P. Schilizzi, and Z. Agioutantis.**  
  1083

- Site Characterization for Prediction and Simulation of Dynamic Events.  
  **D.K. Butler.**  
  1092

### 23. NUCLEAR WASTE ISOLATION: SOME ROCK MECHANICS CONSIDERATIONS

- Rock Support for Nuclear Waste Repositories.  
  **L.W. Abramson and B. Schmidt.**  
  1103

- Prediction of Long-Term Creep Closure in Salt.  
  **J.W. Nelson and P.C. Kelsall.**  
  1115

- Geomechanics Characterization of a Proposed Nuclear Waste Repository Site in Basalt.  
  **K. Kim and W.M. McCabe.**  
  1126

### 24. NUCLEAR WASTE ISOLATION: STATUS OF ROCK MECHANICS CONSIDERATIONS

- An Overview of the OCRWM Program Efforts.  
  **J. Fire, V. Der, and V. Montenyohl.**  
  1139

- Repository Exploration.  
  **D.I. Pentz.**  
  1153

- Geologic High Level Nuclear Waste Repository Considered as an Underground Facility Design Problem.
