7th INTERNATIONAL CONFERENCE ON GROUND CONTROL IN MINING

CONTENT

COAL PILLAR 1

LONGWALL 1

5. Design of Lower Seam Longwall Operations in Multiple Seam Mining, P. Forrest, C. Haycocks, and Y. Zhou, Virginia Polytechnic Institute and State University .......... (43)

6. Method of Selecting Suitable Types of Powered Supports at Longwall Faces, S. M. Hsiung, Y. M. Jiang, and S. S. Peng, West Virginia University .......... (51)

GROUND CONTROL 1

An Overview of the National Roof Evaluation Accident Prevention (REAP) Program, J. M. Krene, Mine Safety & Health Administration .......... (62)

8. Recent Strata Control Advances at Jim Walter Resources Mining Division—Case Studies, E. Martin and F. Carr, Jim Walter Resources .......... (66)

SUBSIDENCE 1

11. Prediction of Surface Subsidence and Strain in the Appalachian Coal Field Using Numerical Methods, Z. Agioutantis, M. Karmis and A. Jarosz, Virginia Polytechnic Institute and State University .......... (93)

12. Computerized Subsidence and Displacement Prediction Using Influence Function Methods, G. Rea, D. J. Reddish, and E. N. Whittaker, University of Nottingham, United Kingdom .......... (101)

COAL PILLAR 2

17. Comparison of Predictions and Measurements of Subsidence Caused by Underground Mining in Northern Appalachia, H. J. Siriwardene and H. Ramli, West Virginia University and J. Amanat, Geotechnology, Inc. ...

18. HYBAD Empirical Field Model for Prediction of Maximum Land Subsidence Associated with Longwall Mining, T. Rymer, D. Yeatts, R. Boswell, and A. Donaldson ...

LONGWALL 2

20. Subsurface Ground Movements Associated with Longwall Mining, P. Gaskell, D. J. Reddish, and B. N. Whittaker, University of Nottingham, United Kingdom ...

21. A Computer Simulation of the Main Roof in Longwall Mining, D. R. Zhu and M. G. Qian, China University of Mining and Technology, China ...

GROUND CONTROL 2

22. Evaluation of Low-Coal ATRS Systems, M. T. Hoch, W. J. Gray, and W. Mine Safety and Health Administration ...

23. Analysis of Major Failure Through Integration of Static and Dynamic Rock Mechanics Investigation, K. Y. Harmay, R. O. Kneisley, and R. T. Brady, U.S. Bureau of Mines, Denver Research Center ...

24. Outbursts and Rockbursts in Coal Mines, J. W. Farmer, University of Arizona and X. S. Tan, Chongqing University, China ...

25. Analysis of the Initial Collapse of the Overburden over Longwall Panels Using Subsidence Data, G. G. Marino, Geotechnical Consultant ...

GROUND CONTROL 3

28. A Simplified Two-Dimensional Analysis of the Roof-Pillar-Floor Interaction Problem in Coal Mines, W. M. Pytel, Y. P. Obough, B. Zabel, and R. D. Cudde, Southern Illinois University at Carbondale ...

GROUND CONTROL 4

30. Seismic Studies over Active Longwall Mines, T. H. Wilson, G. Q. He, and W. Hasslebacher, West Virginia University ...
31. Surface Ground Movements over Longwall Mining in the Pittsburgh Seam, A. W. Khair and P. J. Molosky, West Virginia University.

33. Study of Quantitative Impacts to Ground Water Associated with Longwall Coal Mining at Three Mine Sites in the Northern West Virginia Area, D. Y. Dixon and H. W. Rauch, West Virginia University.

GROUND CONTROL 5

The Broken Rock Zone Around Tunnels and Its Support Theory, F. T. Dong, H. W. Song, and Z. H. Guo, China University of Mining and Technology, China.

Subsidence in Indian Coalfields, N. C. Saxena and B. Singh, Central Mining Research Station, India.

36. Case Studies of Depillaring under Special Strata and Mining Conditions, P. R. Sheorey and B. Singh, Central Mining Research Station, India.

38. Design of the Ventilation Shaft in the South Link Railway Tunnel Construction, Taiwan, J. Keng, Goodearth Mining & Engineering Consultants Co., Taiwan, and G. Chen, Engineering Service Corp.
