Index

A
Alternator
Direct drive .................................. 368
Mando ................................................ 384-385
MerCruiser 470 .................................. 369
Motorola .......................................... 380-384
Roto/stator ...................................... 258-259
Alternator charging system
MerCruiser 470
(air-cooled regulator) ................. 369
MerCruiser 470, 485 and 488
(water-cooled regulator) ...... 369-370

B
Battery ........................................... 60, 364-368
Bell housing (I, I-R and I-MR)
assembly ................................. 515-519
cleaning and inspection .......... 516-517
disassembly .......................... 516
installation ............................. 519-520
removal .................................. 513-516
shift cable inner core ............ 523
Bell housing (II-TRS) ............. 520-521
Breaker point distributor ........ 392-396

C
Carburetor fuel inlet filter .......... 58
Carburetor fundamentals ............. 288
Carburetors
Carter RBS assembly ................. 297-305
Holley 2300-C and 6317-1
assembly .................................. 312-317
Holley 4160, 6407 and 6576
assembly .................................. 326-332
maintenance .......................... 75-76
MerCarb right turn lean-out .... 289
Mercury MD ............................... 305-306
no idle mixture adjustment
(MerCarb carburetor) ........... 289
preparation for overhaul .......... 290
removal/installation .............. 290
Rochester B and BC ............... 291-306
Rochester 2GC, 2GV and
MerCarb 2-bbl ..................... 306-312

D
Delco-Remy external
regulator system ......................... 370-373
Direct drive alternator
charging system ....................... 368
Distributor
breaker point .......................... 392-396
Thunderbolt ............................. 396-397
Drive belt adjustment
replacement ..................................... 385-386
Drive shaft housing
Model I drive
drive gear clearance .............. 493-494
driven gear clearance .................. 494
drive shaft housing ............. 481-488
drive shaft housing
bearing cups ..................... 493
intermediate shift shaft/seat ... 493
top cover/water pocket cover .... 488-489
universal joint .......................... 481
universal joint, drive gear
and bearing ......................... 489-492
upper drive shaft bearing
preload .................................. 494-495
upper drive shaft/driven
gear assembly ..................... 492-493
water shutter clatter .............. 481
Model II ................................ 495-499
Model II-TR and II-TRS drive
drive gear clearance .............. 506
driven gear clearance .......... 506
drive shaft and driven
gear assembly ..................... 504-506
drive shaft housing .............. 499
lower drive shaft bearing cup,
space and coupling .......... 502-503
top and rear cover ................. 502
universal joint/drive gear .... 503-504
service precautions .............. 480-481
Drive system
MerCruiser
MerCruiser model O .............. 404-410
MerCruiser model I
remote control cable
adjustment ......................... 418-419
ride-guide steering cable
attachment ......................... 414-416
shift cable adjustment .......... 417-418
stem drive ............................ 410-412
stem drive and remote
control shift cables .......... 416-417
tilt/trim cylinder
installation .......................... 419-421
transom plate ...................... 412-414
MerCruiser model II
non-transom mounted
changing propeller shaft
rotation ............................... 430
ride-guide attachment .......... 429-430
shift cable adjustment .... 423-428
stem drive ............................ 421-423
throttle control cable .......... 428-429
INDEX

Model I-MR drive (continued).....473-476
  drive shaft pinion gear ..........473-476
  drive shaft roller bearing, .....473-476
  drive shaft and forward .....473-476
  gear bearing roller bearing, .....473-476
  forward and reverse .....473-476
  gear backlash .....473-476
  gear housing .....473-476
  propeller shaft/forward gear .....473-476
  propeller shaft. .....473-476
Model II drive .....461-463
  drive shaft. .....461-463
  gear housing .....461-463
  propeller shaft. .....461-463
Model II-TR and II-TRS drive bearing carrier .....464-466
  drive shaft/pinion gear .....466-467
  gear housing .....467-468
  propeller shaft assembly .....467-468
  shimming .....468-469
  service precautions .....444-445
Gimbil bearing. .....524-525
Gimbil ring
  without side-mounted rotary trim-switch. .....525-528
  with side-mounted rotary trim-switch. .....528-529
  with square upper swivel shaft. .....529-531

Ignition system
  breaker point gap adjustment .....73-74
  coil .....397
  contact breaker point replacement .....73
  distributor cap, wires and rotor. .....73-74
  electrical system .....392-397
  ignition resistance wire .....397
  ignition timing .....74-75
  spark plug. .....71-72
  troubleshooting .....35-38
Integral regulator system
  early model Delco-Remy .....373-374
  late model Delco-Remy .....374-380

L
Lay-up .....84-88
Lubrication
  early model I, IA and IB (includes E-Z shift) .....63-64
  late model I. .....64-66
  MerCruiser II .....66-67

MerCruiser 215, II-TR, II-TRS and III. .....68-69
  Model 0 (60, 80 and 90) .....62-63

M
Mando alternator system .....384-385
  Manifolds
    Ford V8 .....187-190
    GM inline .....108-111
    GM V6 and V8. .....144-146
  MerCruiser 60, 80 and 90. .....224-225
  MerCruiser 470, 485, 488, 170MR and 190MR. .....256
  Motorola alternator system .....380-384

Neutral safety switch .....402

Gil and filter change. .....54-56
  Gil level check. .....52-54
  Gil pan
    FordV8. .....196
    GM inline .....117-118
    GM V6 and V8 .....152-153
    MerCruiser 60, 80 and 90. .....232-234
  MerCruiser 470, 485, 488, 170MR and 190MR. .....264-265

Gill pump
  Ford V8. .....197-198
  GM inline .....118-119
  GM V6 and V8. .....153-153
  MerCruiser 60, 80 and 90. .....232-234
  MerCruiser 470, 485, 488, 170MR and 190MR. .....265-266

Power trim and tilt system
  auto trim system .....546-550
  high pressure pump system .....533-539
  dual solenoid system. .....534
  dual trim test sequence .....537-539
  electrical sub-system .....533
  port trim switch testing .....539
  power trim indicator sender .....402
  pump protection .....534
  single solenoid system .....533
  starboard trim switch testing. .....539
  trailer switch testing .....539
  trim indicator gauge .....537
  trim limit/trim position sender switches. .....535-537
  trim position sender. .....535-537
  trim switch testing .....537-539

hydraulic sub-system. .....539-543
low pressure pump system .....543

R
Rectifier test. .....340
  Regulator (see Integral regulator system)
  Rocker arm cover
    FordV8. .....187
    GM inline .....108
    GM V6 and V8. .....143
  MerCruiser 60, 80 and 90. .....224
  MerCruiser 470, 485, 488, 170MR and 190MR. .....256

S
Starting system
  brush replacement .....388-392
  on-boat testing. .....387
  relay removal/installation. .....388
  solenoid removal/ installation. .....387-388
  starter removal/installation. .....388
  troubleshooting. .....33
  Stem drive lubrication. .....60-62
  Stem drive unit. .....44
  Switches
    ignition system. .....397-398
    power trim control panel switch. .....400-401
    switch panel test. .....400
    three-button switch. .....401
    toggle switch. .....401-402
    two-station tachometer switch. .....398-399

T
Thunderbolt distributor. .....396-397
Troubleshooting
  charging system. .....33-35
  cooling system. .....44
  engine noises. .....41-43
  engine oil leaks. .....41
  engine oil pressure indicator. .....39-41
  engine performance. .....38-39
  fuel system. .....43-44
  ignition system. .....35-38
  starting system. .....69-76

Tune-up

W
Wiring diagrams. .....554-600
