

Group Members Evaluation

PNGE 295 Petroelum Engineering Design

Fall 2000

Part 1: Casing Design

Component	Group Members Name			TOTAL
Well Selection & Data Collection				
Identifying the wells (location, suitability)				100%
Collecting the data				100%
Developing a Database for the data (each well)				100%
Calculations				
Actual casing design and calculation				100%
Any other calculations included in the report				100%
Writing the Report				
Executive Summary, TOC, Abstract, Objective				100%
Introduction, Background, Theory				100%
Results and Discussions				100%
Figures and Tables prepration				100%
Presentation				
Slide prepration				100%
Presentation prepration				100%

NOTE:

1. Please include your own name in the above table too.
2. Please grade between 0% and 100% based on actual participation.
3. Total of each line should add up to 100%
