# Table of Contents

## 1. U.S. Longwall Mining
   1.1. Introduction
   1.2. Requirements and Constraints for High Production Longwalls
   1.3. Panel Layout
   1.4. Mining Sequence
   1.5. Features and Trends of U.S. Longwall Mining
   1.6. Management and Human Factors in High Production Longwalls

## 2. Design Considerations for Panel Layout
   2.1. Introduction
   2.2. General Consideration
   2.3. Longwall Simulations
   2.4. Ground Control Consideration

## 3. Strata Mechanics
   3.2. Introduction

## 4. Panel Development
   4.1. Introduction
   4.2. Distribution and Comparison of Gateroad Development System
   4.3. Methods and Equipment Used for Gateroad Development
   4.4. Survey of Types of Pillar System in Gateroad Development
   4.5. Design of Chain Pillars
   4.6. Roof Support
   4.7. Factors Affecting the Development Rate
   4.8. Determination of Required Daily Panel Development Footage
   4.9. Examples of Gateroad Development Systems
   4.10. Calculation of Coal Recovery Rate in a Longwall Panel

## 5. Shield Supports - General
   5.1. Introduction
   5.2. Two-leg Shields
   5.3. Elements of Shield Supports
   5.4. Electrohydraulic Control System
   5.5. Performance of Shield Supports

## 6. Shield Supports – Design/Selection
   6.1. Introduction
   6.2. Elements of Shield Design
   6.3. Preliminary Determination of Overall Dimension of Shield Components
   6.4. Determination of External Loadings
   6.5. Resultant Load on Canopy and Floor
   6.6. Determination of the Floor Bearing Capacity
   6.7. Torsional Strength of Shield Subject to Bias Loading
   6.8. Static Analysis of Shield Support
   6.9. Testing of Full-Sized Pilot Models

## 7. Coal Extraction – The Shearer
   7.1. Introduction
   7.2. Layout of Longwall Face Equipment Using the Shearer
   7.3. Double-ended Ranging Drum Shearer (DERDS)
   7.4. Cutting Drums and Performance of the Shearer
   7.5. Installed Power of the Shearer
   7.6. Haulage of the Shearer
   7.7. Cutting Methods of the Shearer
   7.8. Coal Loading of the Shearer
   7.9. Automation of the Shearer

## 8. Coal Extraction – The Plow
   8.1. Introduction
   8.2. Plowing or Shearing Longwalling
   8.3. Layout of Face Equipment Using the Plow
   8.4. Types of Plows
   8.5. Basic Factors in Coal Plowing
   8.6. Operations of the Plow
   8.7. Applicable Conditions for the Plow

## 9. Coal Transportation
   9.1. Introduction
   9.2. Layout of Coal Transportation System
   9.3. Major Components of Armored Flexible Face Conveyor
   9.4. Selection of Armored Face Chain Conveyor
   9.5. Coal Transfer System
   9.6. Operation and Maintenance of Armored Face Chain Conveyor

## 10. Application Issues of Longwall Mining
    10.1. Basic Performance Requirements for Shield
    10.2. Control of Adverse Roof Conditions
    10.3. Two-leg Shields vs Four-leg Shields and Chock Shields
    10.4. How to Accurately Measure Hydraulic Leg Pressure
    10.5. Pre-driven Recovery Room
    10.6. Longwall Mining Under Hard-to-cave Roof
    10.7. Cutting Through a Fault
    10.8. Pillar Design for Gas/Oil Wells
    10.9. Fast or Slower Longwall Advance Rate
    10.10. Bottom Coal, Hard Face, Soft Floor, and AFC Creeping -- Causes, Problems and Solutions

## 11. Ventilation, Methane, Dust, and Noise
    11.1. Introduction
    11.2. Ventilation
    11.3. Methane Control
    11.4. Dust Control
    11.5. Noise Control

## 12. Longwall Face Move
    12.1. Introduction
    12.2. Pre-move Preparation
    12.3. Move Preparation
    12.4. Move
    12.5. Installation of New Face at the Setup Room

## 13. Longwall System Control and Power Distribution
    13.1. Introduction
    13.2. Electrical Power Distribution
    13.3. System Control

## 14. Surface Subsidence
    14.1. Introduction
    14.2. Characteristics of Surface Movement
    14.3. Effects of Geological and Mining Factors
    14.4. Subsidence Prediction, Assessment and Mitigation
    14.5. Surface and Groundwater Effect

### Appendices
- A. Ranking of Powered Supports
- B. Sequential drawings of Bi-directional Full Face Cutting

### Indices
- A. Author’s Index
- B. Subject Index
